Maximum Security Gate System for High-Use Passageways

RELIABLE

Virtually maintenance free, Tymetal's 2200-A Swing Gate System is manufactured to meet the demanding requirements of maximum security and to provide for the safe, secure movement of inmates.

SECURE

The 2200-A Pedestrian Swing Gate System is fully assembled at the factory and shipped to the project site ready for installation. The controlled swinging motion of the 2200-A gate system assures continual lock alignment with minimal maintenance.

DURABLE

Constructed from 10-gauge hot-dip galvanized steel, the virtually indestructible 2200-A Swing Gate System is the ultimate swing gate system in today's correctional market.

VERSATILE

The 2200-A Swing Gate Systems is offered in 42" and 60" openings with 84" clear height.

OPTIONS

Tymetal's pedestrian swing gate systems may be equipped with a variety of access control equipment, including card readers, speaker box and cameras.

SAFETY

New UL 325 regulations require a separate entrance for all pedestrian access. Do not carry the risk of liability associated with allowing pedestrian traffic to enter through a vehicle sallyport.

ENGINEERED

Tymetal offers complete CAD (Computer- Aided Design) services from the conceptual stages of your project to the final submittal drawings. Additionally, all of our 2200-A swing gate drawings are available via e-mail.

TECHNICAL DATA

Electro-mechanical lock:

- Deadbolt throw – 1.5"
- Solenoid deadbolt - .75" diameter
- Electrical – 110 VAC, 1 Phase, 12 Amp Inrush
- Current – 0.6 Amp Seated Current
- Control Wiring – 110 VAC

Tymetal ships the highest quality enclosure systems nationwide to installers from two locations:

In New York
2549 State Route 40
Greenwich, NY 12834

In Texas
4501 Dixie Farm Road
Pearland, TX 77581
