Maximum Security Gate Operator for High-Use Passageways

RELIABLE

Virtually maintenance free, Tymetal's 2150 Swing Gate System is manufactured to meet the demanding requirement of correctional facilities and allow gatekeepers the safe, secure movement of inmates.

SECURE

The 2150 Pedestrian Swing Gate System is fully assembled at the factory and shipped to the project site ready for installation. The controlled swinging motion of the 2150 gate system(s) assures continual lock alignment with minimal maintenance.

DURABLE

Constructed from 10-gauge hot-dip galvanized steel, the virtually indestructible 2150 Swing Gate System is durable and reliable.

VERSATILE

2150 Swing Gate Systems are offered in 42", 48", 60" and 72" clear opening widths and 84" clear height for single swing gates. Double 2150 Swing Gate Systems are available; contact Tymetal for various designs and sizes.

OPTIONS

Tymetal's pedestrian swing gate systems (single swing or double swing) may be equipped with a variety of access control equipment, including card readers, speaker box, cameras and a electro-mechanical locks.

SAFETY

New UL 325 regulations require a separate entrance for all pedestrian access. Do not take on the liability associated with allowing pedestrian traffic to enter through a vehicle sallyport.

ENGINEERED

Tymetal offers complete CAD (Computer-Aided Design) services from the conceptual stages of your project to the final submittal drawings. Additionally, all of our 2150 Swing Gate drawings are available by e-mail.
