

BALLISTIC PROTECTION SYSTEMS

MADE IN THE USA

Superior Perimeter Security with Ballistic Protection.

Designed as an all-encompassing solution, our systems redefine security standards for substations, government facilities, and high-risk sites, where the need for impenetrable perimeter defenses is paramount. Our Ballistic Protection Systems integrate UL listed ballistic panels with gates, doors, walls, and shields. Providing innovative and reliable solutions, TYMETAL remains committed to satisfying the most demanding needs of the security industry.

Key Features:

- ▶ Offers top-tier ballistic resistance protection certified to UL 752 Level 10.
- ▶ Tested and certified to withstand multiple 50 caliber 710-grain M2 ball projectiles in a concentrated area.
- ▶ Custom designed and engineered to match the aesthetics of your facility.
- ▶ Can be combined with our crash rated gates, barriers, and fence solutions.
- ▶ Made in the USA at our manufacturing plants in New York and Texas.

DURABLE

TYMETAL manufactures within a Quality Management System certified to ISO 9001:2015 International Standard and the American Institute of Steel Construction. Our Welders are certified to the highest level of the American Welders Society.

TESTED

Designed, Engineered, Tested for Ballistic Resistance to withstand multiple 50 Caliber 710-grain M2 ball projectiles in a concentrated area. Our Ballistic Protection System is Certified to UL 752 Level 10.

SUPPORT

TYMETAL associates deliver comprehensive assistance starting from the initial design stage, extending through installation and beyond, guaranteeing steadfast backing for our products.

VERSATILE

Our adaptable ballistic panel can be applied to a variety of structures including gate, door, or fence frames.

THE TYMETAL SYSTEM

Diverse Finish Options: Painted panels are attached to a galvanized frame, both of which can be color-matched to your selected RAL or paint system.

Tailored Configurations: Our systems are highly configurable, ensuring a perfect fit across varying site grades, heights, and perimeter shapes. This adaptability allows us to provide a customized solution tailored to your unique security requirements.

Ultimate Ballistic Defense: The infill is constructed from UL 752 Level 10 ballistic panel sheets, reinforcing your facility with top-tier ballistic protection, ready to withstand even the most rigorous security scenarios.

Certified Crash Performance: Our Ballistic Protection Systems integrate UL listed ballistic panels with gates, doors, walls and shields. Providing innovative and reliable solutions, TYMETAL remains committed to satisfying the most demanding needs of the security industry.
